CS262 Logic and Verification
Introduction to Prolog

<https://tutorcs.com>

WeChat: cstutorcs

- Prolog = **P**rogramming in **L**ogic
- A programming paradigm (imperative/procedural, functional, object-oriented) — another way of thinking
- Basic principles: recursion+induction
- Taught in lectures, practised in exercises
- Labs and coursework assignment will use Prolog
- Installed on lab computers (use SSH), recommend installation also on private laptops
- Also available via web interface (no installation needed)
- See Prolog links/tutorials on the Moodle page
